

Back of Room Computers (BoR)

- The following policy was set:
 - If a classroom has BoR computers they can stay until they don't work anymore. They will not be supported if they do not meet the minimum standard for hardware according to policy guidelines. A slightly newer computer **cannot** be swapped with an older BoR computer.
 - If a teacher requests BoR computers, they must propose how the computers will assist teaching the standards to their respective principal. The principal must support the proposal for the request to continue.
 - Adequate power, furniture, and space must be available.
 - The district tech team will determine if there is technology available to set up and support in fulfillment of the request. (Computers previously set up on a network will not be available for stand-alone use). Set up will be lowest priority for district tech team.
 - Teachers who have BoR computers from grants will fall under this policy.
